

01-20-1984, p. 1

Name		POWELL, DONALD		Semester	SPRING 1984	
Period	Monday	Tuesday	Wednesday	Thursday	Friday	
1 3:00 3:50		8:00 - 9:15		8:00 - 9:15		
2 9:00 9:50		1		1		
3 10:00 10:50		9:30 - 10:45 2		9:30 - 10:45 2		
4 11:00 11:50	AH 201 Library C	11:00 - 12:15 AH 102 A Library C	AH 201 Lib C Ren A&A	11:00 - 12:15 AH 102 A Library C	AH 201 Lib C Ren A & A	
5 12:00 12:50	office	3	office	3	office	
6 1:00 1:50	office	12:30 - 1:45 AH 102 B 4 Library C	office	12:30 - 1:45 AH 102 B Library C	office	
7 2:00 2:50	AH 202 Library C	2:00 - 3:15 5	AH 202 Lib C Baroque-Rococo	2:00 - 3:15 5	AH 202 Lib C	
8 3:00 3:50		3:30 - 4:20 6		3:30 - 4:20 6		

DWP mailed me this copy of his schedule for the Spring semester. He did so today. I opened it (the letter) in the car on the way down to Mud Valley Hospital with HLRP to see RTP. He was admitted yesterday -- bad, very bad headache & vomiting. When HLRP and I arrived, Russell looked very good. Very bright and animated. Not at all groggy & "drugged," although he might have been highly drugged. I am presently convincing myself that his recent bad night was a "dark night of the soul" and that he is now on the road to recovery. Certainly the mind, the conscious analytical human mind, can enter into the realm of medicine. William & Ann were there when HLRP and I arrived. HLRP called me in the late morning and said that she was going down to the Hospital. I said I wanted to go and she picked me up at noon. We did several errands before that: I tried to exchange my Christmas sweater that Brookvalley gave me (none available at Penney's); HLRP picked up something at the Customer service window at Sears; HLRP picked up some tax forms at the IRS on Adams Avenue in Scranton; HLRP picked up Brookvalley's toaster (un-repairable) at Vac Way in Scranton. No day was very very cold: around zero degrees Fahrenheit much of the day. During our hospital visit, WSP also arrived, looking very jauntily in a yellow sweater & a green jacket. WSP himself is now seeing a doctor about his uric acid -- apparently it is too high (whatever that means). He has been advised to eat fish and poultry and to cut down on beef and pork, which will be difficult for WSP because beef and pork are the two staples of his diet. He and HLRP both as physically in very good health and both of them are seventy years old. Neither one of them has ever
